

9. Wireless Congress: Systems & Applications

November 14-15, 2012
ICM München (Germany)

Call for Papers & Workshops

As they increase in performance, wireless technologies are also becoming more complex. No matter whether in the industrial, consumer, communication or computer sector: Innovation is progressing in a variety of directions, encompassing a whole number of different applications, markets and standards. The specialist's thirst for information is thus growing at a fast pace.

The magazine Elektronik, the organizers of the electronica show and the German Electrical and Electronic Manufacturers' Association (ZVEI) are consequently staging the **9. Wireless Congress: Systems & Applications** on November 14-15, 2012 in Munich, in parallel to electronica show.

All in all an excellent forum for an exchange of knowledge and experience among wireless professionals.

The program committee invites you to submit proposals for speaking opportunities. In addition, we warmly invite academia to give an insight into their future-driven research and development.

Topics of interest include, but are not limited to:

- ZigBee: chips and system applications
- Automotive Wireless
- Bluetooth – new applications
- Wireless automation and M2M – components, modules and systems
- Wireless Sensor Networks
- UWB – broadband data transmission
- SRD / ISM-radios: wireless for industrial use
- WiMAX /LTE – high speed data for long distances
- Wireless systems – qualification, certification, approval
- Interoperability and Coexistence of wireless sensor networks and systems
- Security threats and countermeasures in wireless deployments
- NFC/RFID – new developments and applications

- 4G / UMTS / LTE mobile telephony
- 802.11x - new WLAN technologies, standards and applications
- Wireless system development and integration into legacy Industrial Systems
- Location services
- Health and Medical Wireless Applications
- Embedded wireless
- EMC and interoperability problems
- Power Management / Energy Harvesting
- other topics out of the wide spectrum of “Wireless Technologies”

The program committee invites you to submit proposals for speaking opportunities (presentations approx. 30 min., workshops or tutorials approx. 1,5 or 3 hrs.).

The purely technical and practically oriented papers are to be presented in English. The papers will look at fundamentals, trends, technologies, applications, standardization, certification and estimations of the market. Workshops will deal with basic themes and last 1,5 or 3 hrs. Marketing-oriented papers will not be considered. All submissions will be reviewed and judged by the program committee. Congress and workshop papers will be published in a special volume and subsequently made available to all participants.

Please make a note on the following deadlines:

- Deadline for abstracts: June 14, 2012
- Notification of acceptance: end of July, 2012
- Deadline for final paper: October 17, 2012

Please submit your abstract using the submission form until June 14, 2012 at <http://www.wireless-congress.com/call-for-papers/submission-form.html>
